Version 8.9.0 Released

Thoroughbred Software Announces the Release of Version 8.9.0 Thoroughbred® Environment and OPENworkshop®. The 8.9.0 release is an enhancement release based on comments and suggestions we have received from the Thoroughbred mail-list forum and our support department.

Some highlights are:

- Support for: OpenSSL 3.0 (Record Encryption 3.0)
  OpenSSL 3.1 (Record Encryption 3.1)
  OpenSSL 3.2 (Record Encryption 3.2)
  Open SSL 3.3 (Record Encryption 3.3)
- Support for 128-character files names.
- Input and output format data with JSON strings has been added to the TFF() function via the 'JI' and 'JO' options.
- Support for foreign characters in CVT() options 32, 1024 and 4096.
- Support for MySQL 8.0 and MariaDB 10 and 11.
- Default Record Encryption for the Windows BASIC has been changed to 3.0.
- Files for loading and starting Thoroughbred programs as a service are now included in the master files.
- New WEB License Manager that provides more deployment flexibility to better support Virtual Machines, Linux Containers, and Hosting solutions.

For more information on 8.9.0, contact your Thoroughbred Representative.
