

## Installation

1. Logon to Windows 2003 Server as **Administrator**.
2. Place TS Environment for Windows 8.6.0 CD in CD drive.
3. From the **Start** button select **Run**.
4. Type **chgusr/install** and select the **OK** button.

### Note:

If Auto run is not configured (if it is not on the 2003 Server): from the **Run** window type the name of the CD drive (i.e. D:) and select the **OK** button. Select **Launch.exe**.

5. From the Thoroughbred Installation Menu select **Installation**.
6. Select **Next** to accept all defaults.
7. Enter the **Serial Number** and **Module Code** (both are located on the label on back of the CD case).
8. Select **Next** to accept all defaults and then select **Finish**.
9. When Message Box appears asking to restart computer select **NO**.
10. **EXIT** from the Thoroughbred Install menu and remove TS Environment for Windows CD.
11. Restart the system (from the **Start** button, select **Shutdown** and then select **Restart**).

## Merge the Files

1. Log back on as **Administrator**.
2. From the **Start** button, select **All Programs**, and then select the Thoroughbred icon.
3. When the Activation screen appears, activate Basic.
4. At the Thoroughbred Installation screen select **A** to install **All listed products**.
5. Once Thoroughbred Basic has been installed, make the TBSC folder a shared folder on the server using the following steps using normal Windows procedure.

**Note:** From the server desktop select **My Computer**; select the **C:** drive; select **Program Files**; right-click the **TBSC** folder; select **Properties**; select **Sharing**; select **Share this Folder**; add the Users or Group allowed to share this folder (default is Everyone); select the **Permission** button; select **Allow full control**, Change, Read. (Read only is the default); and select **Apply**.
